ABOUT S-TECH SWITCH SYSTEMS

S-TECH Switch Systems are proudly engineered, developed, designed, manufactured and assembled in the USA. S-TECH was born trail riding at 10,000 feet at night for those who insist on the best lighting and a well-engineered and reliable switch system. Each unit is assembled in our Colorado manufacturing facility and 100% tested. It is only then that each unit is provided a unique serial number and includes a “BEST IN CLASS” buyer protection 5-year full replacement warranty.

S-TECH delivers solutions to the challenges of off-roading while delivering safety, reliability, function and convenience. Our Made-in-the-USA injection molded, automotive grade ABS switch housing and TTO designed custom plug and play wire harness has the OEM “look” we all want in our vehicle accessories. The look and feel of the S-TECH Switch Systems are second to none.

5 Year Buyer Protection Warranty

We are very pleased with how our Made in the USA product line has been received within the off-road community. Our tremendous sales growth, customer acceptance and most importantly the high level of customer satisfaction is exactly why we created the S-TECH brand. We are proud of our 5 STAR rating on Google Business and the list of satisfied customers grows every day. To recognize the confidence we have in our simple, efficient design and it’s build quality, we offer a 5 year warranty on all serialized S-TECH Switch Systems™.

In order to protect your warranty, we do not recommend modifying our systems in any way. If any modification you do creates a warranty issue, there may be a coverage issue. Therefore, please be careful and consult with an electrical specialist and use generally accepted electrical practices if you choose to modify any S-TECH System.

From all of the team members at S-TECH Switch Systems, we thank you for choosing S-TECH.

Thank you

Scott Bove, President / Founder

CUSTOM DUAL 2232 Push Button System:

Available in WHITE / RED or BLUE / GREEN
I bought a new switch S-TECH system and installed it with no issue. This system just came out and I needed it quickly to be able to install other mods for an upcoming trail run. Scott went out of his way to make sure I got what I needed way quicker than expected. Top notch support and company!
– TJ

S-Tech is a class act. I was able to speak with Scott tonight, who is the owner, while purchasing a new product of theirs. His passion for his product is evident just by hearing him talk. He’s proud that all of his products are all designed, and made, right here in the United States of America, and he shows that by supporting the US military and law enforcement with product discounts. His last words before we got off the phone were “this is my cell just in case you have any issues”. If that isn’t customer service, I don’t know what is.
– Justin G.
TOYOTA Tacoma ‘16–’19

**4 Switch System Housing**

STECH-4 TAC1618-HS-0

Switches are customer supplied

MSRP: $29.99

Great products and excellent support! I had a couple of questions and Scott was there right away to assist. He was extremely helpful and knowledgeable. He had me fixed up in a matter of minutes. As far as the S-TECH switches that I purchased, they are top notch! Love the way they look in my Toyota and the quality is over the top! Thanks again!

– Robert S.

Do you already have an S-TECH Switch System installed in your vehicle? Want to upgrade to a newer, custom system? Visit online at stechswitch/upgrades now to check out options.

Custom Logic
If you would like to have a custom harness built to control your switch logic – example: Switch #1 turns on the entire system or Switch #1 is a “lock-out” for the “Locker” switches etc, we can build your harness to your specifications.

Visit us online for more info! STechSwitch.com/accessories
The team at S-TECH has been nothing but amazing to work with. Went with them instead of the other competitors on the market because of their price and because of what I had heard in terms of customer service. Don’t let the price fool you, you are getting a solid switch system that is backed by a 5-year warranty and I have no doubts that they will stand by it. Can’t recommend them enough.
– Travis H.

Ordered a 4 switch for my sons’ JK online with some extra printed switch covers for his windshield pillar lights and eventual purchase of some rock lights. About an hour later I get a call asking if I would like the printed covers installed and they made sure I had everything I was going to need. That’s great customer service! When the package came in a few days later we open it up to find a couple of rock lights thrown in! My son is excited about the install and I couldn’t be happier about my decision to go with the S-Tech system. Thx y’all. – Sean J.

Absolutely amazing customer service and honesty. When I bought my system I put in a promo code that gave me $10 off. But the code was actually for 10% off which would have been more. Scott emailed me and called me the next morning to inform me I had some extra credit and could either upgrade or get the money credited back to me. He was also very prompt and clear on explaining any questions I had. AMERICAN made product, supports veterans, and amazing customer service. I couldn’t ask for more. – Jerrell L.

I recently purchased an S-Tech Switch System for my Ram 2500. My truck is a 2012 and I purchased the 2013 and newer kit since they don’t have one for my years. It worked with some minor trimming and reworking of the plastic dash mount. I am very pleased with this switch setup as it simplifies a lot of wiring frustrations. The switch panel is highly versatile for customization. I added a 7 pin switch and a couple extra grounds to accommodate a couple dual color light bars that are controlled off of separate grounds. Very pleased with this kit and S-Tech products!
– Kyle F.

The instructions that come with the S-TECH System are really detailed and simple to follow. The thought that went behind the design is very evident! I highly recommend this system.
– Preston S.
