

TECH-LITE Low Voltage Adjustable Disconnect

Instructions

“ + ” button:

Press once to display the protection value, long press to set the protection value

“ - ” button:

Press once the display the return difference value, long press to set the return difference value

Note: While programming the ON / OFF values, once the “OFF” is saved, the “ON” value is a fixed number that you add to the “OFF” value. eg; OFF = 11.5 ON = 1 for the system to turn back on at 12.5V.

Factory Setting:

OFF: 11.5 V ON: 12.5 V
